---

## PROFESSIONAL SUMMARY

AI and ML learner with strong proficiency in Python, Data Structures, and Machine Learning concepts. Experienced in implementing real-world applications using NLP and data analysis, and passionate about designing intelligent problem-solving systems.

---

## EDUCATION

|                                                                                                                                                                                                       |                                                                                         |
